

REEG MX FLYWHEEL WEIGHT

CAUTION: Use gloves when handling the weight or avoid making direct contact with the weight as the oils from your hands will tarnish the metal.

Application: CRF/XR50 or CRF/XR70 with Kitaco Inner Rotor installed. Also fits KLX110 with Kitaco Type II Inner Rotor.

Installation: Remove side cover. Apply blue lock tight to the bolts included and fasten the weight to Kitaco flywheel as shown in the picture below. Once installed, check to make sure the weight is secure against the flywheel. Briefly run engine and recheck bolt tension before riding.
